

Company

Storage & logistics of cryopreserved samples

Areas of activity

- Stem cells
- Advanced Therapy Medical Products (ATMPs)
- GMOs
- Drugs
- DNA & RNA & Protein Fluids
- Back-up-Storage of MCBs & WCBs
- Storage Temperatures at 4°C, -20°C, -80°C, -150°C and -196°C in LIN

Storage facility

310 m² storage place
GMP, BSL 2, S2-GenTG (GMO)
ISO 9001:2015
AABB accredited

Management

Dr. Vincent v. Walcke-Wulffen

Safe life with BioKryo

BioKryo combines the most recent Fraunhofer-Cryostorage-Technology with more than ten years experience in cryopreservation and the shipment of cells, tissues, biomolecules and DNA.

As a Biobank, BioKryo connects innovative standards for long term storage of biological samples with trend setting solutions and competent consultings as well as further services.

BioKryo possesses a manufacturing authorization for the storage of therapeutic samples according to the German Law of Drugs (§ § 20c, 52a AMG). We are certified according to ISO 9001:2015 and have been accredited by the AABB in 2016.

Biobanking Services

- Storage of cryopreserved cell collections
- Storage of human cells and tissues according to §20c AMG and § 52a AMG (German Law of Drugs, Storage authorization holder)
- Sample management for clinical trials
- Storage of infectious cells up to biosafety level II (BioStV, GenTG)
- Optimization of preservation protocols
- Back-up of existing biobanks
- Global logistic services
- Consulting and support for design, setup and operation of cryobanks
